- Low cost hardware solution by using the same POS device
- Reduces the required POS counter space

Technical specifications

- Local Windows-based lottery server
- Utilization of NAMOS compact POS Graphical User Interface
- Use of existing network infrastructure
- Approved lottery-specific printer

Through innovation and partnership with customers around the world, Wincor Nixdorf has been shaping the lottery world and driving results for more than 30 years. From the introduction of the first offline lottery terminal to our latest introduction of an integrated lottery solution at the POS, we have consistently been at the forefront of delivering business solutions to help lotteries increase sales, improve customer service and create new sales channels.

With NAMOS lottery, Wincor Nixdorf has integrated a powerful and reliable lottery solution into the NAMOS compact POS solution that eliminates the need of a full function lottery terminal. It enables service station operators to sell lottery quick tips directly at the POS. NAMOS lottery is an additional component of

A one stop solution:

■ The *i*-SERVICE STATION

For each quick tip the integrated lottery server randomly generates lottery numbers printed on a lottery-specific, electronically readable receipt.

The service station operator uses the touch screen to perform the usual lottery sales transactions. After the winning lottery numbers are drawn the customer can redeem his winning ticket at the service station to claim his prize.

NAMOS lottery provides a cost-effective solution for instant lottery service at service station outlets by addressing new target groups. NAMOS lottery is easy to install and fit into the busy retailer environment.
