

Medi@Service Portal

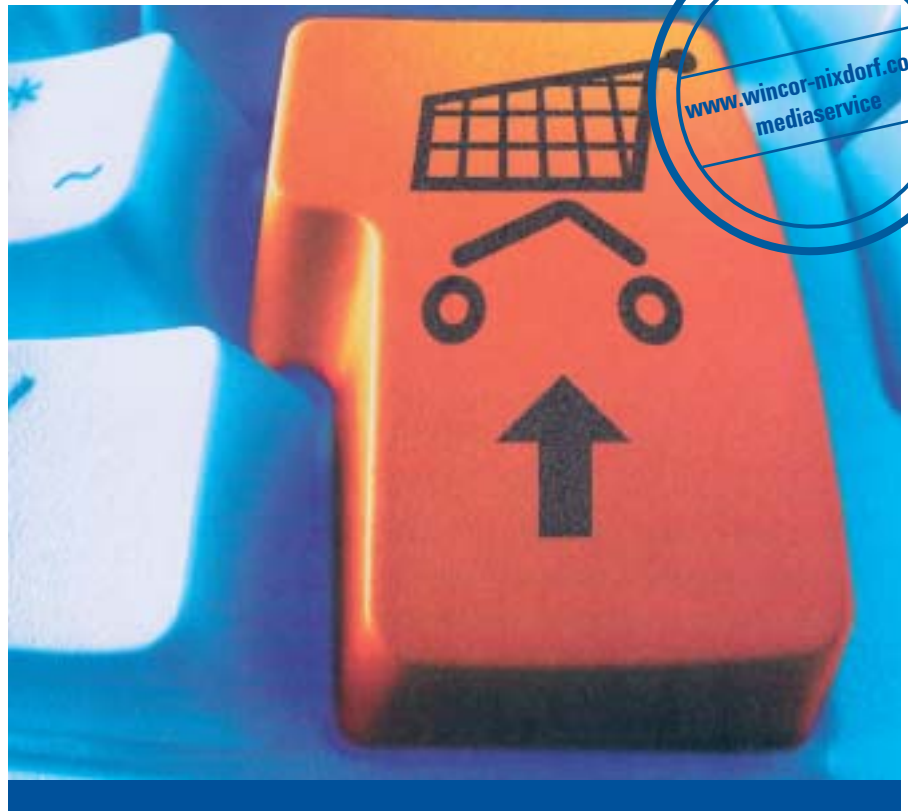

'One-Stop-Shopping @ Wincor Nixdorf'
Convenient and easy ordering of
high-quality consumables

The Wincor Nixdorf Medi@Service portal is not just an eShop with a large range of products, but also contains a broad range of functions that make it a unique, holistic purchasing solution.

www.wincor-nixdorf.com/mediaservice

Features

- Approval management
- Completion of the required portfolio through the integration of other catalogs
- "Master Admin Concept"
- Enquiries on delivery status
- Secure data transfer through encryption
- Different delivery addresses per item
- User-specific favorites
- Full search functionality

■ High quality consumables for maximum system availability. This is precisely what the Wincor Nixdorf Medi@Service portal provides, 24 hours per day, 365 days per year. Everything is available from a single source, from accumulator batteries to Zekosa cleaning cards, all at a great price/performance ratio. Additional eShop requirements can also be covered via the Wincor Nixdorf Medi@Service portal from one of the additional product catalogs.

Medi@Service Portal

APPROVAL MANAGEMENT

In times of cost cutting, the "paired principle" is indispensable for purchasing volumes above a certain limit. The "approval management" function is provided in the Medi@Service portal in order to make this principle as easy as possible to apply.

Up to 5 different order limits with 5 different decision-makers can be specified. It is possible to define whether all relevant decision-makers have to agree or if only the last decision-maker is asked. The decision maker is notified by e-mail and can log on in the portal by means of a "one-off login" contained in the e-mail.

INTEGRATION OF OTHER CATALOGS

Wincor Nixdorf offers Medi@Service as a "one-stop shopping" solution for all e-shopping requirements. This means that a wide range of providers can be selected and individual suppliers can be incorporated in the Medi@Service portal as necessary. Catalogs in BME-Cat format will be integrated in the existing solution within a very short space of time.

THE "MASTER ADMIN CONCEPT"

Wincor Nixdorf offers the "Master Admin Concept" for larger enterprises. Based on this concept, a master administrator is given the right to create new users within the organization and to assign them catalogs. Thus, the Wincor Nixdorf Medi@Service portal becomes the customer's own eProcurement system.

ENQUIRIES ON DELIVERY STATUS

In order to offer the customer a transparent ordering system, the delivery status of the order can be called up at any time via the Medi@Service portal.

DATA SECURITY

Data security is an important topic in Internet-based ordering and procurement systems.

The Medi@Service portal is secured with 128 bit encryption and thereby offers optimum security.

DIFFERENT DELIVERY ADDRESSES

In order to take advantage of synergy effects, purchasing volumes are often being gathered together in a central purchasing organization. However, in order to ensure that not all deliveries are sent to central purchasing, different delivery addresses can be specified on an item-by-item basis.

USER-SPECIFIC FAVORITES

In order to make the search for products easier, every user can create a variety of favorites lists.

FULL SEARCH FUNCTIONALITY

As order numbers for the required products are not always available, the customer can perform a convenient full search in all selected catalogs in the Medi@Service portal.

BENEFITS AT A GLANCE

- Original materials
- "One-Stop-Shopping" through additional catalogs
- Convenient ordering
- Wide range of functions
- Availability 24 hours per day 7 days per week under
