

# BEETLE /Kiosk Terminal

The Indoor information system

**Info systems**, whether for customers or staff, are becoming more and more important in retailing. Be it customers looking for offers tailored to their specific requirements or wanting to check their bonus points from the customer loyalty program. Promoting sales of products using multimedia in the store. For checking the price of goods that are not clearly labeled. Or for staff who record their working time electronically and receive up-to-date sales information at the start of work. These are exactly the kind of requirements addressed by the BEETLE Kiosk Terminal.

**On the basis** of the BEETLE /S point-of-sale system, Wincor Nixdorf is introducing an individually configurable, space-saving kiosk terminal especially for indoor use in retail environments. The wall-mounted system is connected to the local LAN either by standard cabling or by radio signal (RF) and offers an intuitive user interface via a flat display with touchscreen functionality. The TFT technology used permits brilliant presentation of the information. Touching the screen with a fingertip, the user can navigate through the program, call up the required product information or order the prize from the bonus points scheme. The system is equipped with powerful Intel Celeron or Pentium III  $\mu$ -processors to ensure acceptable re-

sponse times. The terminal has built-in speakers, supporting sound-based applications, as well as a card reader allowing the use of magnetic strip or chip-based customer cards.

**Used in conjunction** with a scanner, it can become a price-enquiry unit or a goods-receiving terminal. Use of standard components from the BEETLE

product portfolio means Wincor Nixdorf is offering an attractively priced package, an entry-level kiosk terminal which integrates seamlessly with existing BEETLE POS solutions

## TECHNISCHE DATEN

---

### SYSTEM UNIT

- Intel Celeron 566 MHz/1,2 GHz
- Intel Pentium III 600 MHz
- 64 bis 512 MB SDRAM
- Harddisk 2,5" IDE
- FDD, CD-ROM or DVD-drive
- LAN onboard
- Integrated loudspeaker
- Holder for wall mounting and drive lock

---

### DISPLAY

- 12,1" oder 15" LCD TFT
- Capacitive- or resistive-touch
- Magnetic card- or smart card reader optional

---

### BARCODE SCANNER

- Optional

---

### OPERATING SYSTEM

- Windows XP
- WNLPOS
- WEPOS
- MS-DOS 6.22

---

### DIMENSIONS

Hight: approx. 490 mm

Width: approx. 345 mm

Depth: approx. 260 mm

---

### APPROVALS

- TÜV-GS, UL, cUL, CE, CB, FCC
