

# BEETLE /iSCREEN

## Promotion and Multimedia Screens

**Thanks to their excellent technical features** and brilliant design, the screens can be used in almost any setting: as information displays at counters in airports, banks or post offices or as advertising screens in retail. No matter where they are used, Wincor Nixdorf's flatscreens are always eye-catching.

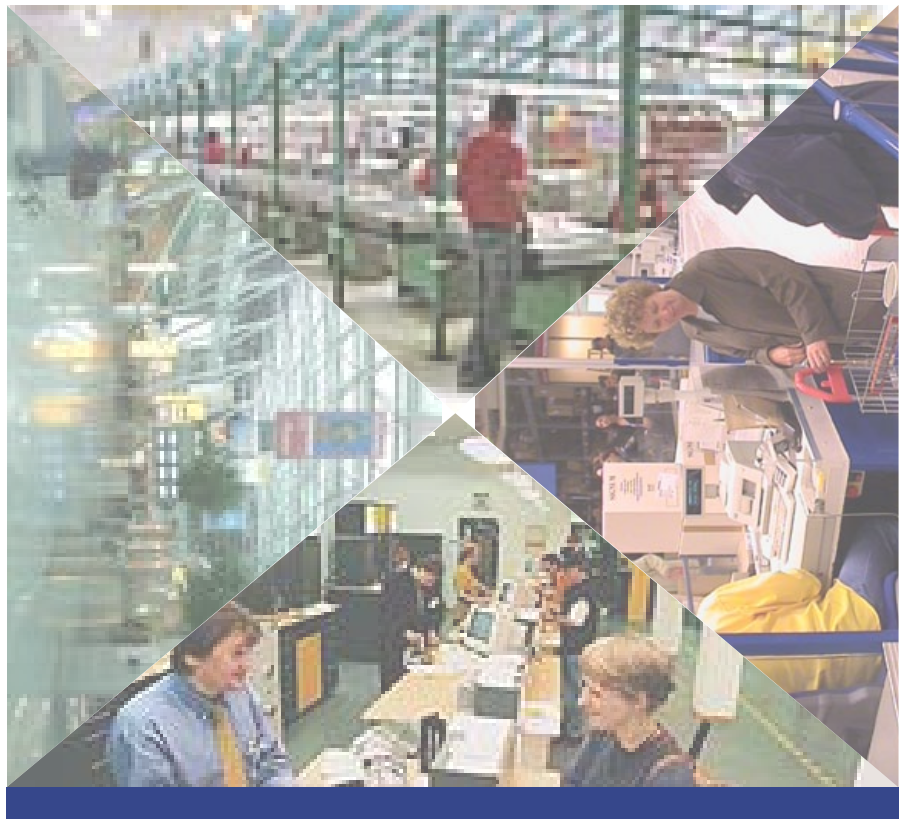

### Information screens

Today's electromechanical information boards no longer represent a state-of-the-art solution in terms of the flexibility of their display and noise level. Wincor Nixdorf flatscreens are ideal for all aspects of audiovisual reproduction because they offer an almost endless number of possibilities for presenting contents and format

### Advertising screens – the electronic poster

Advertising holds the key to differentiating comparable products and services. At the same time, the advertisements themselves must differ in their content and positioning in order to grab the customer's attention.

When developing new concepts, the conventional poster and the variety of possibilities it offers sets the standard for solutions like these.

■ Wincor Nixdorf's scalable flatscreen family is the ideal platform for advertising and information. Ranging in size from 19" to 50", these products stand out because they are light, have minimum depth requirements and interfaces that perfectly match the intended application.

# Promotion and Multimedia Screens

## TECHNICAL DATA

Nonetheless, customers today expect advertisements that change with and embrace state-of-the-art technology in terms of relevance, quality and appeal. When combined with intelligent solutions, Wincor Nixdorf screens bring advertising to life: promotion in motion.
