

# Xion /S

## The compact lottery terminal

**Xion /S is the ideal entry level terminal for small and mid-sized lottery outlets. It combines a compact form with a wide variety of functions.**

With the Xion /S, Wincor Nixdorf Lottery Solutions rounds off its product portfolio at the lottery market's entry level. This system makes cost-effective lottery sales possible even at locations without high customer traffic.

The Xion /S has an attractive "all-in-one" design. All the modules of a classic lottery terminal can be integrated in this compact device, including a scanner for reading playslips and a thermal printer for printing lottery tickets. Additional installation options include a smart card reader for customer cards and a barcode reader that can be used, for example, to validate instant tickets.

There are three user panel variants available. The most economical model features a combination of display, softkeys and keyboard. Alternatives are offered in the form of various touchscreens that make the system even easier and more comfortable to use.

Wherever space or costs preclude the use of conventional lottery terminals, the inexpensive Xion /S terminal is the economical alternative with the most comprehensive functionality.

### ■ Small, simple and smart!

Xion /S from Wincor Nixdorf is a genuine multi-talent among the compact lottery terminals on the market, and is thus the ideal entry system for lottery companies all over the world.

# Xion /S

## SIZE MATTERS – FLEXIBILITY IS CRUCIAL!

The multitasking Xion /S can be individually configured according to your wishes and your investment budget. From the simplest keyboard-and-screen combination to the more exclusive touchscreen terminals, you can create a wide variety of terminal variants – it's as flexible as you need it to be!

**With its outstanding advantages, Xion /S is the optimal entry system for lottery companies:**

- Low initial investment compared to classical lottery terminals
- Sale of lottery products possible even at locations where conventional terminals are not cost-effective
- Simple, economical development of a comprehensive sales network
- System offers scope for new business activities and development of new sales channels
- Installation possible even in the smallest lottery outlets
- Xion /S practically self-explanatory and thus requires almost no employee training
- High availability thanks to robust construction
