

Xion /Xpress

Lottery Kiosk System

The future belongs to Xion /Xpress: autonomous self-service terminals that no longer need operating staff and are as easy to use as an automated teller machine will become established as a modern sales channel for lotteries.

Self-service machines are there where you need them, 24 hours a day, 7 days a week. The very idea of having to wait in line to withdraw money or buy tickets at a counter is unimaginable.

That is why Wincor Nixdorf has developed the new Xion /Xpress, a self-service terminal that meets all the requirements of the lottery sector. Integrated in an attractive functional design, it provides all lottery and payment functions with tried-and-tested Wincor Nixdorf components.

A touchscreen guides users through the self-explanatory menu with playful ease. After paying conveniently by EC card or cash using the bill acceptor, customers are issued their lottery ticket by the integrated thermal printer. Xion /Xpress gives businesses the freedom to offer self-service in perfection. It can be tailored to a very wide range of individual requirements and expanded flexibly if needed.

Apart from all its functions, however, the Xion /Xpress impresses with outstanding quality and extraordinary robustness in everyday use.

■ Reliability and multi-functionality in a modern design. The Xion /Xpress is the groundbreaking self-service terminal for the future-oriented lottery market.

Xion /Xpress

24/7 - Self-service in perfection

Customer advantages at a glance:

- Xion /Xpress is the right answer to the trend toward self-service
- Players can place bets entirely by themselves
- Customer friendliness thanks to a self-explanatory touchscreen interface
- Use of a certified, secure payment module
- Modern, functional design
- Uncomplicated, flexible installation
