

# PM@WN

The standard for professional project management from Wincor Nixdorf

Version 1.2

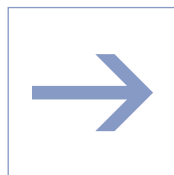

# Planning, controlling, monitoring

Every project is unique. There are, however, methods, tools and control systems which make every phase of a project faster, more effective and more economical.

Wincor Nixdorf's constant focus: A clear goal, a clear path and results that are spot on

**Wincor Nixdorf has tailor-made solutions for project management. Based on the internationally accepted standard of the Project Management Institute (PMI®), we offer a proven method suitable for all: PM@WN.**

PM@WN brings together decades of sector-specific experience in the banking and retail sectors and comprehensive project management expertise. Wincor Nixdorf has recognised that an integrated project management helps our customers to continue to be successful. Wherever, in projects with our customers, workflows need to

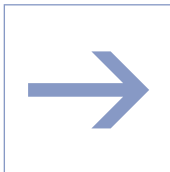

be more efficient, or brand-new IT systems call for the redesign of organizational structures, Wincor Nixdorf project management is there to help. In many cases, specially trained and certified project manager plan, organise and monitor the project until a successful project finish. The heart of every action is compliance with schedules and budgets and assured quality.

# A system based approach born on experience

Anyone looking to improve structures has to think complexly and deal flexibly. Not only does the project management help to achieve this, it also saves time and goes on the budget.

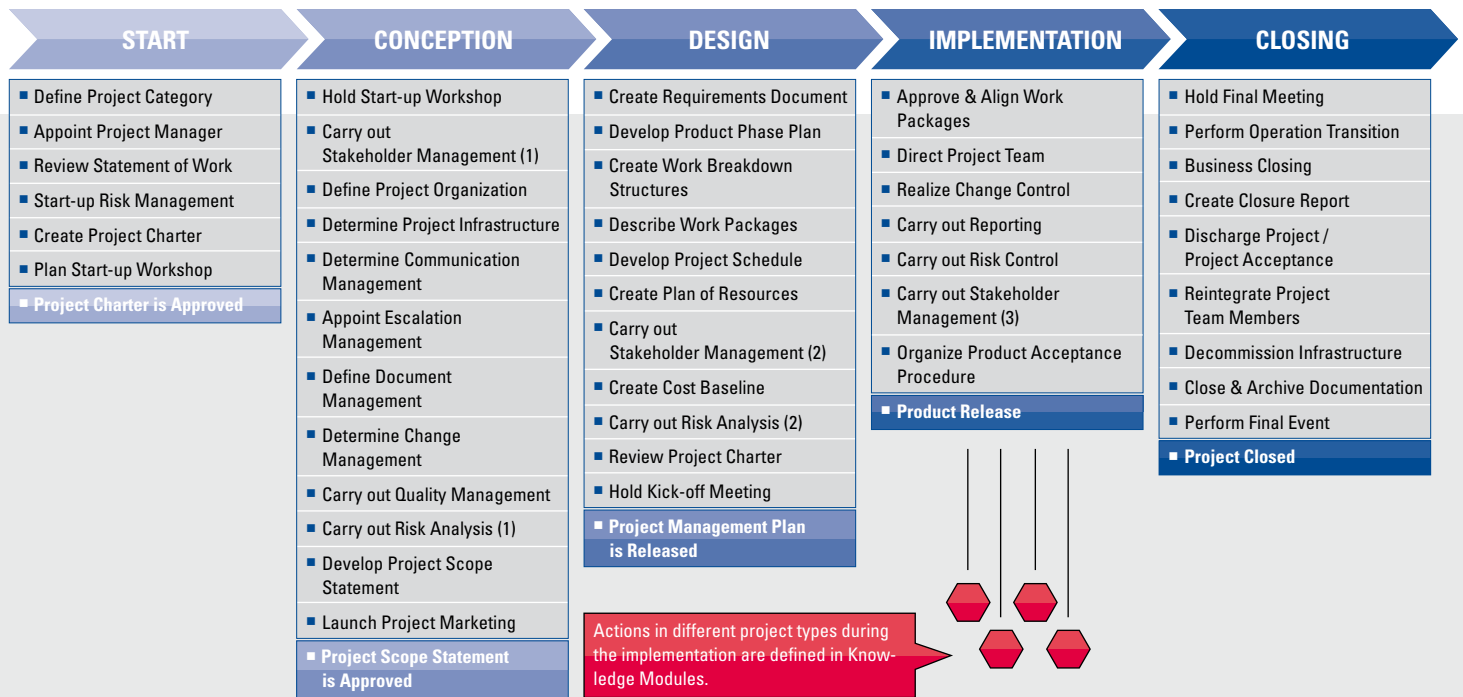

The capacity of the products is expanded by the versatile services that Wincor Nixdorf offers. Focused on product related services, managed services and outsourcing, project management becomes more and more important. PM@WN is based on the PM Body of Knowledge of the Project Management Institute (PMI®) the world wide benchmark for project management.

## How does PM@WN work?

Project management from Wincor Nixdorf encompasses a carefully thought-out system made up of methods, tools, qualification programs and instruments of control, which support that every project with our customers goes according to plan. The uniform PMI® standard guarantees that all involved use the same terminology. Thanks to a common perception of the process involved in a project, PM@WN can be deployed right across Wincor Nixdorf environment. All those involved have a wealth of soundly-based knowledge and up-to-date information on the project

management at their disposal. Thus, project teams get the possibility of a optimised project start and a fast team building. New employees can be rapidly integrated into the teams. The goal is to realise efficiently cross-business by an intelligent information- and communication management. One key point of our future work will be the documentation and backup of project experiences in the PM@WN in order to make these information available for other projects.

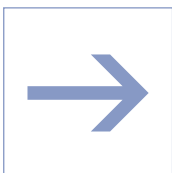

PM@WN offers a uniform approach for successful customer projects of every size.

**How you benefit:**

- High level of project transparency
- Global applicability
- Planning certainty

- Comprehensive control options
- Adherence to deadlines
- Cost efficiency
- Flexible Knowledge Modules

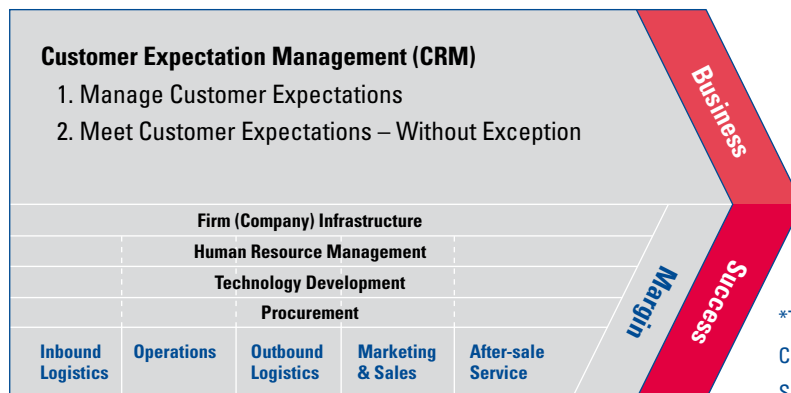

**PM@WN: The 21<sup>st</sup> Century Value Chain\***

The 21<sup>st</sup> Century Value Chain places the success in business into the central point of action. Therefore it is very important

to manage and to meet customer expectations. Project management is an important module to achieve this goal. With PM@WN

Wincor Nixdorf has a uniform and continues basic to guarantee the success in business permanently.

# Company-wide up to date

To guarantee the high standard of the Wincor Nixdorf Project management also in the future, project management offices are provided on site implying qualified specialists.

With PM@WN you can be certain that your project will run reliably and securely.

For an international operating company like Wincor Nixdorf it is required to bundle project groups and project members in a company-wide PM Community. The Project Management Center of Excellence is available for the organisation of this global PM@WN network. This central unit is responsible for a continuous information exchange as well as for the training and coaching of the PM Community.

Based on practical experience the Project Management Center of Excellence supports the local project teams by optimising and updating the methods and tools. PM@WN ensures that projects can be realised smoothly, efficiently and according to plan in every phase of the process chain. Wide-ranging know-how and

experience provide the basis for professional project management from Wincor Nixdorf. This global network is available both to customers and business partners, who profit from the uniform approach of our project management methods and the highly effective tools and multifaceted opportunities for continuing education. All of this creates lasting added value for the successful use of project management. Find out how your project can securely and smoothly achieve all its goals. With PM@WN you can make use of the right connections.

**Global, innovative and efficient.**
