

Take your stores to the next level with Wincor Nixdorf's iBISTRO QSR, the POS and back office software solution that delivers a superior customer experience, empowers your employees, and streamlines operations.

**FAST, FLEXIBLE AND
FUTURE-PROOF.**

QSR is all about speed, and iBISTRO is the ideal solution for today's fast-paced world. It combines speed with the accuracy and reliability that are essential for great customer service, plus it gives you the tools you need for effective store management. iBISTRO is the best of both worlds: a highly efficient and profitable front end, combined with a comprehensive back office system that keeps your stores running with precision.

Highly flexible, iBISTRO can be tailored to your specific needs, whether you run a small operation or a regional or nationwide chain. iBISTRO was designed by QSR operators, and we understand that your requirements are different than anyone else's. Wincor Nixdorf will work with you to design a store configuration that meets your unique needs and allows you to get the most out of your store systems.

iBISTRO's modular design and open architecture will adapt to your future requirements, allowing you to maximize and protect your investment. In addition, a highly resilient client ensures reliability, increases uptime, and minimizes maintenance and service costs. Combine iBISTRO QSR with Wincor Nixdorf's BEETLE POS systems and world-class service and support, and you have the ultimate solution for a successful operation.

**A PERFECT COMBINATION OF FAST, EFFICIENT
OPERATIONS AND GREAT CUSTOMER SERVICE.****INCREASE SALES AND IMPROVE
CUSTOMER SERVICE.**

From order entry to management and back-office operations, iBISTRO is easy to learn and use. Our highly customizable menu screens allow you to determine the easiest way for cashiers to enter orders, and an unlimited number of menu items gives you the freedom to design menus that work best for your operation. Flexible in design, iBISTRO supports up to three drive-thru lanes with multiple terminals ensuring fast service. iBISTRO includes suggestive sale prompting and powerful promotions management capabilities — all designed to increase your sales.

iBISTRO allows you to have multiple button colors and sizes on touch screens, plus drop-down ingredient lists that allow your employees to easily modify orders and give your customers the service they expect. This flexible screen configuration enables your employees to be

trained quickly, saving you time and money in a high-turnover industry. An enterprise menu manager allows you to set prices at the corporate, regional, district and store level, giving you the flexibility you need to maximize sales.

**TRUE MULTI-CONCEPT
CAPABILITIES.**

The convergence of different retail concepts and segments creates a need for true multi-concept capability — and iBISTRO is the answer. iBISTRO QSR allows you to combine multiple brands at a single location and accommodates combo meals that cross brands. With iBISTRO, you can view sales by brand for food production and restaurant analysis, allowing you to understand restaurant sales trends and make adjustments as needed.

A CLEAR VIEW OF YOUR OPERATIONS.

iBISTRO features many back-office functions that allow for more efficient operations. Automatic inventory adjustment with each customer order gives you accurate inventory counts by shift, day, week or period. Unlimited item tracking allows you to track the sales of a particular item, and auto menu download gives you the ability to change menu item pricing for all registers in one step.

Real-time, automatic updates are just one of the ways that iBISTRO QSR simplifies your operation. Reports are also available around the clock for labor management, human resources, and store financials, giving you a clear view of store performance across the enterprise.

FEATURES AND FUNCTIONS.

iBISTRO QSR consists of five modules — POS Client, Manager's Workstation, Store Controller, Enterprise Controller, and Menu Manager.

POS CLIENT

The standard cashier's workstation, the POS Client requires either the Manager's Workstation or the Store Controller installed on the same network. The POS Client includes the following features:

- Unlimited items and menus, multiple button colors and sizes, and multi-concept menus.
- Support for suggestive sale prompting and promotions management.
- Intelligent order modification, order recall, and one-touch item changes, deletions and multiplication.
- Employee time clock.
- Supports online credit and automatic updates with either Manager's Workstation or Store Controller installed.
- Full integration with iBISTRO Menu Manager.

MANAGER'S WORKSTATION

The iBISTRO Manager's Workstation includes all the same features of the POS Client, plus:

- Basic store reporting features, including sales, labor and exception reports.
- Cashier assignment and cashier/till balancing.
- Time clock controller.
- Built-in credit router.
- Menu and update distribution.
- Consolidated transaction database.

iBISTRO STORE CONTROLLER

The ultimate in store management, the Store Controller employs a robust, redundant database that ensures data integrity in the most demanding environment. The Store Controller fully supports multi-concept installations and all the functions of the Manager's Workstation, plus an extensive set of additional features. A partial list includes:

- Manager's dashboard that reports real-time sales, speed of service, items sold, labor costs, and much more.

- Full labor scheduling and reporting capabilities, including a labor law module.
- In-store safe and deposit control.
- Distribution of menus and updates.
- Set-up parameters by registers and targets.
- Complete inventory management features.

iBISTRO ENTERPRISE CONTROLLER

For organizations that require centralized control, the Enterprise Controller provides total control of all stores from a central location. Features include:

- Centralized software updates and configuration control for all POS Clients, Manager's Workstations, and Store Controllers.
- Menu update support for corporate, regional, district and store menus (requires iBISTRO Menu Manager, sold separately).
- Consolidated financial and labor reporting at the enterprise and store level, with ability to create custom reports.
- Enterprise-wide messaging.
- Integration with existing corporate systems through Wincor Nixdorf's Service Division.

MENU MANAGER

The iBISTRO Menu Manager is available in Enterprise and Standard versions. The Standard version is a stand-alone application purchased by store, while the Enterprise version is available as an add-on product to the Enterprise Controller. The Standard Menu Manager supports a single pricing level, while the Enterprise version supports corporate, regional, district and store pricing levels.
